CASH@POS CASH@KIOSK

TOUCHLESS CASH PAYMENT SOLUTIONS

CIMA manufactures the industry’s most comprehensive range of compact cash recycling solutions designed to automate cash payments at the point of sale (POS). Customers can pay directly into our recyclers and receive change without handing money to the operator. This reduces cash shrink and eliminates the need for managing cash manually

at POS. CASH@POS is ideal for supermarkets, convenience stores, cafés, fast food/QSR, bakeries or pharmacies.

Our CASH@KIOSK range allows Quick Serve Restaurants (QSR) / fast food outlets to accept cash payments and dispense change at self-serve kiosks and at the point of transaction thanks to our kiosks with fully integrated note and coin recycling technology. Why force customers to queue at a traditional POS lane to pay with cash? Our

cash-enabled kiosks can also be used in self-service bill payment applications or retail self-check-out applications where weighing product is not needed.

Our range of consumer-facing cash handling solutions is the evolution of decades of experience of manufacturing machines that are fit-for-purpose in wide range of market segments. We have multiple configurations so businesses can deploy what’s right for them.

BENEFITS

- Automate the cash handling process at point of sale
- Can be used by staff or customers
- Staff do not physically handle cash
- Better job satisfaction
- Improve customer experience
- Improve staff productivity – more time with customers and value-added store activities
- Clean and hygienic solution
- Increase security and reconciliation to optimize business processes
- Easy integration in any store format / checkout
