# CashComplete™

RCS-700

High Speed Note Recycler

Efficiency with Large Storage Capacity
Float and Till Management Solution

RCS-700 Features

Continuous High-Speed Deposit (10 notes/second)
Facilitates fast checkout by eliminating downtime while waiting for batches to process

Increased lifespan of 15M notes
Reduces downtime and service costs

Superior Jam Prevention
Combined with simplistic, horizontal note path results in higher machine up-time

Customizable Cassette Configurations
Can be modified even after a machine is deployed

High Capacity (up to 16,400 Total Note Capacity, 13,600 Total Recycling Capacity
Means minimal vault transactions, reduction in CIT pickups, and reduced risk of running out of the most commonly used denominations

Smart LED Machine Status Indicator
Lets employees know the condition of the machine

Built-in Drop Safe
With separate access

Technical Specifications RCS-700

Software	CashComplete™ On-Device
Counting Speed (Deposit/Dispense)	10 notes/second, up to 600 notes/minute continuous feed
Recycling/Deposit Capacity	9,000 - 13,600 notes / 2,800 - 4,600 notes
Double Recycling Cassette	Yes, 1,800 + 450 notes = 2,250 note capacity
Denominations	Up to 8 denominations to be recycled (If using four Dual Recycling Cassettes)
Configurable Cassettes	1-4 cassettes with single or double compartments
Safe Rating	UL 291 (CEN IV on request)
Size (WxDxH) without PC	21" x 37" x 42" (53 x 93 x 105 cm)
Power and Frequency	100-240 VAC, 50/60 Hz

Options: Integrated bar code reader, Biometrics
Software: Fully integrates with the CashComplete™ network with back office administration and pickup service functionality, multi-currency support, and monitoring/reconciliation services.

RCS-Active Features

Massive 32,000 Coin Capacity
Extends time between administrative activities

2,000 Coins Processed Per Minute
Allows efficient coin processing and quick end-of-shift deposit procedures

Active Sorting®
More than conventional coin sorting – Active Sorting® provides a higher throughput thanks to its advanced sensor technology

Advanced Sensors
By detecting diameter, thickness, surface & bulk conductivity, and magnetic properties the RCS-Active enables more sophisticated sorting

Coin Outlet Chutes
Improved "Y-chutes" reduce jamming during deposit. Each hopper has a dedicated outlet to further reduce jam possibilities

Accessible Height
At just under 46" tall, the RCS-Active remains accessible while maintaining high capacity

Separate Access to Upper/Lower Compartments
Increase serviceability and security by reducing access to the coin vault

Technical Specifications RCS-Active

Deposit Speed	Up to 2,000 coins per minute
Dispense Speed	Up to 2,400 coins per minute
Recycling Storage	Up to 23,400 coins / 8 coin hoppers (individually addressable)
Storage Pickup / Overflow	Up to 8,650 coins
Total Capacity	32,050 coins
Denominations	Up to 8 denominations to be recycled, international currencies available
Size (WxDxH) without PC	26.97" x 29.78" x 45.61" (685 mm x 756 mm x 1,158 mm)
Voltage and Frequency	100-240 VAC, 50/60 Hz

Software: Fully integrates with the CashComplete™ network with back office administration and pickup service functionality, multi-currency support, and monitoring/reconciliation services.
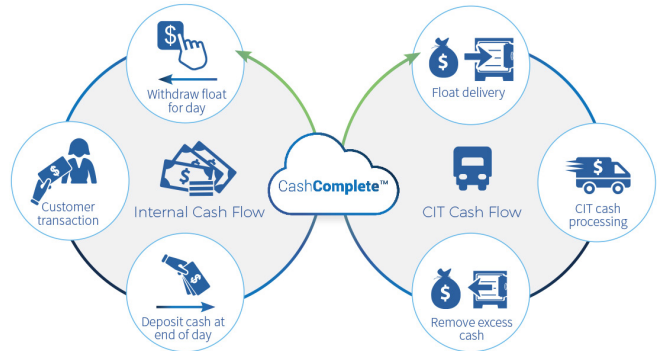

Software Solutions

Cash is a Cross-Functional Challenge and CashComplete™ is the Solution

The future of cash demands that businesses arm themselves with efficiency against encroaching competition by scrutinizing every area of the enterprise where cost savings can be made, and operational efficiencies can be put in place. CashComplete™ Connect is the ultimate solution for superior financial and operational control of cash. Gain visibility of all activities at the point of sale, back office, and throughout the auditing process with the CashComplete™ Connect platform.

▶ **POS Balancing (Retail Edition)**
Automatic reconciliation of daily balances through Point of Sale (POS)

▶ **Financial Control**
Real time transaction monitoring

▶ **CIT Integration**
Integrate our solutions to CIT management systems for fast order requests and bank deposits

▶ **Maximum Uptime and Service**
Real time device and event monitoring to ensure maximum uptime

▶ **ERP Integration**
Reports daily balances and accounting

▶ **Optimize Cash**
Sharing insights into your cash cycle can be used for cash order planning to ensure the right level is always on hand

CashComplete™ delivers excellent ROI for its customers. While results vary by operating factors, some of the most common areas where ROI is generated:

- Reduce Cash room FTE (Full Time Employee) hours
- Reduce Cashier FTE (Full Time Employee) hours
- Reduce CIT fees

- Reduce Cash handling fees
- Reduce Cash variation costs
- Reduce Cost of cash on hand

Ideal Cash Management Ecosystem

Integration of Hardware and Software Solutions

In 2019, we launched SUZOHAPP Digital - a new business unit focused on innovation, expertise development, and customer care. With this new unit, our intention is to introduce the possibility of a fully integrated ecosystem where hardware speaks to software and software speaks to operations management for full business visibility and control.

Consolidation of Unattended and Attended Payment Points

Future-proof your business with technology that communicates with both cash and cashless payment types by integrating all payment points within one ecosystem.

Full Control and Visibility of Cash Management Operations

The future of cash demands that businesses arm themselves with efficiency against encroaching competition by scrutinizing every area of the enterprise where cost savings can be made, and operation efficiencies can be put in place.
The future of cash operations is automated.

Vault
Connect

Connect All of Your Cash

VaultConnect™ brings cash in vaults or other offline cash storage into full view, allowing users to monitor their true cash positions and incorporate all available cash into daily operations. Currently, many retailers track funds stored in vaults separately from funds stored in cash recyclers and smart safes. VaultConnect™ allows users to pull all their cash-related data together using the CashComplete™ Connect platform. Deposit and withdrawal information for vaults can be entered into any CashComplete™ On-Device enabled machine, be it a standalone PC, cash recycler, or smart safe. Vault data is then available to view in the same way as recycler and smart safe data, clarifying cash positions across units and locations and maximizing the productivity of cash by supporting the daily operations of the business. By extending the visibility of cash, VaultConnect™ improves overall cash management within the organization.

- Manage offline cash using the familiar CashComplete™ On-Device user interface

- Gain full visibility of all cash independent of location

- Refill an RCS with cash from a vault using VaultConnect™ to reduce CIT visits

Easily Integrate Your Cash Vault Inventory Into the CashComplete™ Connect Dashboard with VaultConnect™

Bring Accountability to Offline Cash Storage

VaultConnect is revolutionary because it connects to the CashComplete™ Connect cloud-based environment, and turns what normally is an arduous task of keeping track of static cash within a dumb vault or deposit safe, into an integrated solution between the vault, the recycler, CashComplete™ On-Device, and CashComplete™ Connect - offering the retailer full visibility of all cash in operation, independent of location.

Easily Input Vault Transactions Using QR Codes

Reduce CIT Visits

With VaultConnect™, Cash in Transit (CIT) provider visits will become less frequent and shorter in duration. For many retailers, CITs deliver cash by refilling cash recyclers. However, vaults hold more cash and are quicker to replenish than recyclers. If CITs were to fill vaults instead of recyclers, they would be able to deliver more cash per delivery, make shorter visits, and return less frequently. A retailer can simply use its own money to replenish its cash recyclers rather than calling on CITs as frequently. CashComplete™ Connect unifies cash in recyclers and smart safes with cash in vaults using VaultConnect™, allowing all cash to be monitored in one place and used to support the operations of the business.
