

TR250 Series

The Tidel **TR250** note recycler is designed for organizations that handle large volumes of banknotes on a daily basis. With a volume capacity of over 10,000 notes at a processing speed of 8 notes per second, the **TR250** offers the performance and capacity required to automate a high volume, transaction-heavy cash room environment.

The **TR250** note recycler enables the automated recycling and dispensing of notes in a back office cash environment. With a volume capacity of over 10,000 notes and note processing speed of 8 notes per second, the **TR250** secures, automates, and accelerates the start and end of shift processes for cash-intensive businesses. The **TR250** enables retail employees to spend less time counting and handling cash, and more time on their core business.

When paired with a Tidel coin recycler, the **TR250** is an ideal solution for high volume back office cash automation - enabling speed, accuracy and accountability for the recycling of notes and coin, minimizing store float and the frequency of CIT pickups.

At the heart of the **TR250** is the software solution that powers it. The **TR250** software suite is expansive, easy to use, and completely adaptable to any user environment. The **TR250** software simplifies the process of managing users, assigning permissions, running reports, and managing cash balances. The **TR250** offers a status bar that provides a dashboard-like status of all system components, allowing for proactive engagement when needed. The **TR250** also enables remote access capability, so authorized parties can perform necessary maintenance, or assist with troubleshooting, if required. The **TR250** offers the industry's most comprehensive software package needed to manage the note and coin processing of a cash-intensive retail establishment.

TR252

The **TR252** cash recycling system offers integrated note and coin recycling at high volumes and fast throughput, offering improved security, reduced cash handling, and accelerated start and end of shift processes for cash intensive retail environments.

TR253

The **TR253** cash recycling system offers integrated note and coin recycling at a throughput rate of 3,000 coins per minute, making it ideal for higher volume cash environments.
