

CashTechIQ Software Overview

Track and Manage Your Company's Cash Effortlessly

Gain Greater Control and Visibility of Your Company's Cash

CashTechIQ is the ideal software solution for retailers with multiple cash management systems and nationwide store locations.

CashTech IQ provides centralized management and visibility of change orders, cash deposits, device alerts, and reporting. This simplifies and enhances cash management in retail environments that use cash management hardware.

Feature benefits include enterprise-level transaction visibility, configurable real-time device status and transaction alerts by denomination, and decreased cash handling costs with optimized change orders. Proactive alerts minimize service maintenance and costs and provisional credit for US customers improves cash flow. Custom reporting reduces IT costs while centralized control reduces the need for service calls, and overnight bank credits for deposits made optimize cash flow.
